SEED CORN ADMINISTRATOR

WM. G. ECKHARDT, 120 West Adams Street, Chicago, Ill.

"SON! DO YOU KNOW THAT YOUR SEED CORN WILL GROW?"

GET YOUR SEED CORN NOW

The seed corn situation is the worst in the history of the State. If wheat or oats fail, we can plant corn and grow a paying crop. When corn planting time comes you must have good seed, or fail. Hundreds of farmers have put away corn not a kernel of which will grow. Damp weather in October; immature corn; and early hard freezing has killed it. Test your seed corn. Know it will grow. Help yourself and help each other. Prepare the seed bed well. Don't plant corn too deep. Help yourself—don't depend upon others.

CORN IS ILLINOIS' GREATEST CROP

No greater mistake can be made by the farmers of the Corn Belt than to reduce materially the area in corn. The system of farming and the crops that have proven good and most profitable for the past twenty years are those that should be followed and grown this year.

If you are in need of seed corn, or if you have a surplus that might be used to help some one else, consult _____

PRICES FOR CORN

Germination	Buying Price	Selling Price	Cost per acre for seed corn
70 - 79%	\$4.50	\$ 6.00	\$0.86
80 - 89%	6.50	8.00	1.15
90 - 100%	8.50	10.00	1.43

Corn germinating 70-79% will be used only as a last resort, except in case of exceptionally desirable corn.

W. F. HANDSCHIN, Vice-Director of the Agricultural Extension Service, University of Ill.
